### Abstract

No one imagined that Covid-19 would turn our world upside down and would bring major changes to our lifestyle. The virus has spread everywhere like a wild forest fire due to which numerous changes were accepted by people all over the world, and it took some time for everyone to adapt to the new normal. Online learning is rapidly becoming one of the most effective ways to impart education. The impact of the virus was so strong that online education became a seemingly ubiquitous part of our growing world, which resulted in the closure of schools and no further physical interaction of teachers with students. Fortunately, soon enough most of the schools and educational institutions moved to online mode to resume their studies. As a result, education has changed dramatically, with the distinctive rise of e-learning, whereby teaching is undertaken remotely on digital platforms instead of physical classrooms.

**Keywords:** Online classes, Covid-19.

**Introduction:** Online classes and technology have emerged as a superhero during the lockdown days. We have all been under house arrest but are still connected with the world of education. Due to the lockdown, students have not been able to stay connected with the outer world and the lack of exposure is evident. The only reprieve for the students' mental well-being has been the transition to online classes. Teachers made sure that the learning for students was not compromised, so they took a great leap forward to find solutions and create new learning environments for their students to ensure that learning never stops. With little time to prepare, curriculums were modified, new lesson

plans were created, activities were planned, all so that their students remain actively involved through online learning. Technology has been an integral part of our life. The Internet, smart phones, and television are indispensable parts of most of our lives. Hence it is difficult to avoid its interference in our daily activities. The impact of technology isn't limited to entertainment. The education sector is widely affected by it too. Online education is the place where education and technology come together. It is the electronic mode of teaching and learning which enables the student to learn from anywhere. The form of online education varies from
