Clarification for Geotag Photos

This is to clarify that our college has started using geotag images from the academic year 2020-21 for all events and activities. Therefore, the events prior to that were documented using common camera images. We have used Geotag pictures in many photos as possible but some activities might still remain in standard photos.

NATURE E-WASTE

The modern age is being described as 'electronic age'. Almost every year, the Telephones, T.V sets, Cameras, Recording Instruments, Video and CD's etc. are being poured/flow rapidly into the markets. The affluent/wealthy people have almost gone mad after the newer models of say motor cars that are coming into the market the questions arises- what is to be done with the older models of such things? Either the old models are resold or thrown into the dump.

Some of the material used in these electronic equipment's are toxic and poisonous. Some having unused batteries are inflammable which may catch fire. Some metals like lead, mercury etc are dangerous. Hence the careful handling and disposing of such material is necessary. The materials or the E-waste are to be collected separately and not to be mixed up with the normal solid waste.

It may be noted that the state of Maharashtra is at the top among the States of India in creating the large amount of E-waste

World Environment Day

Many of the large Page 2 of 5 area and population but the local authorities have so far neglected
