SOCIAL SURVEY REPORT
2017-2018

Topic: A study on children education in the slum and the problem faced by them

Majority of India still lives in villages and so the topic of rural education in India is of utmost importance. A survey named called the; **A study on children education in the slum and the problem faced by them**, shows that even though the number of poor students attending schools is rising, but more than half of the students in fifth grade are unable to read a second grade text book and are not able to solve simple mathematical problems. Not only this, the level of math and reading is further declining. Though efforts are being made, they are not in the right direction.

In collaboration with NSS, Research committee conducted a survey on the basis of 40 sample Slum in Nallasopara.in month of July - August 2017 .The initiative was taken by students and teachers.

Following are the problems facing by poor family:

- Most of them are not qualified, not capable to teach their children by own.
- With low level of earning they are not capable to send their children to school.
- Dropout rate is high.
- No government school forcing them to depend on private school
- With lack of job security poor parents are not giving similar opportunity to girls students
- Parents living in poor quality house with lack of safety.

We can solve the above problem by the following:

- We have to do proper counselling about importance of education.
- Girls and boys should be treated equally.
- Government support is needed to solve the problem completely.
